WASH Economics Conference 2024

May 21-22, 2024 | Marseille (France)

The WASH Economics conference aims to bring together academics doing research on **water supply, sanitation, and hygiene (WASH)**. The 2024 edition of the conference will take place from 21 to 22 May at the Aix-Marseille School of Economics in Marseille (France) and via video-conferencing (hybrid format).

The event is co-organised by the Aix-Marseille School of Economics (AMSE), the London School of Hygiene & Tropical Medicine, and the Institute for Fiscal Studies.

Keynote lecture

Molly Lipscomb, University of Virginia

We are inviting abstract submissions. Paper topics may relate to any area of WASH economics, loosely defined as how actors (e.g., individuals, providers, governments) make decisions about the allocation and means of providing scarce resources in the delivery and use of WASH services. Submissions related to any setting globally are welcome, as are submissions from researchers working on such issues within disciplines beyond economics (e.g., engineering, public health).

For any question, please contact the local organization
washeconomics@amse-aixmarseille.fr

Submissions

Extended abstracts should be submitted via this link:

<https://washeconomics.sciencesconf.org/>

They should be 300-400 words and may include 1 figure or table if desired. Abstracts should be work in progress rather than published journal articles, but may be working papers or pre-prints.

Attendance is free and includes lunches and a conference dinner.

Key dates

- Submission: **until February 15, 2024**
- Decision to authors: **March 4, 2024**
- Registration: **until March 25, 2024**
- Full paper submission: **April 12, 2024**

Agenda

2-days workshop organized in 4 sessions (2 AM-sessions and 2 PM-sessions), short and longer presentations with discussion (50 min and 30 min) and a panel discussion.

Scientific coordination

- Britta AUGSBURG, Institute for Fiscal Studies
- Habiba DJEBBARI, Aix-Marseille Université, AMSE
- Nicolas GRAVEL, Aix-Marseille Université, AMSE
- Ian ROSS, London School of Hygiene and Tropical Medicine
